## About Me

I am a passionate Software Engineer, specialized in front-end development using React and TypeScript. I have a strong affinity for design and user experience, constantly seeking opportunities to improve the design, accessibility and functionality of my work.

My relentless pursuit of learning ensures that I stay updated with the latest trends and technologies.

## Experience

### Senior Mobile and Web Developer

18 Techs | Mar 2019 - Present

- Currently part of the DarkPOS team, I hold the responsibility for developing and maintaining all client-facing mobile applications. Additionally, I play an active role in the creation of the next iteration of our platform.
- Contributed to the maintenance of a workout video mobile app using React Native.

### Front-End Developer

CreativeDrive | Feb 2018 - Mar 2019

- Joined as a React developer to work on the creation of an online Casino.
- Developed web applications using mostly React and AngularJS.
- Taught the development team the basics of React.

### Front-End Intern

4Geeks | Aug 2017 - Dec 2017

- Developed a course platform using Angular, Typescript and Firebase.
- Designed the User Interface with Material Design.

## Education

### University of Costa Rica

Bachelor of Business  
Computing

Mar 2014 - Dec 2017

## Languages

**English** - Fluent

**Spanish** - Native
